

# King Calcium

## Product Information Sheet

### Description and Uses

King Calcium is a 10% liquid solution that is used to stabilize nitrogen applications and increase overall plant nutrient uptake. It can be mixed with liquid nitrogen and applied, or it can be broadcast ahead of all types of nitrogen fertilizer applications.

The calcium in this product is 100% available. Inexpensive sources of calcium, such as limestone, contain very small amounts of available calcium. If the soil is deficient in calcium or the calcium is not available, vital nutrients cannot reach the plant and plant health suffers.

### Benefits and Features

- Stabilizes and Holds Nitrogen
- 100% Readily Available Calcium
- Improved Nutrient Uptake
- Improved Soil Structure
- Increased Drought Tolerance
- Balanced pH

**tarasolutions**  
ECO-FRIENDLY FERTILIZATION

# KING CALCIUM

• HOLDS NITROGEN IN THE SOIL • IMPROVES NUTRIENT INTAKE • BALANCED PH

### KING CALCIUM APPLICATIONS

Dilute King Calcium with water at a 20:1 ratio.  
(i.e. 9 ounces of King Calcium to 1 gallon of water)  
**Apply to the soil:** oz (undiluted) Per 1,000 sq.ft.

Guaranteed Analysis	
Calcium (Ca).....	10.00% (Derived From Calcium chloride)
Inert Ingredients.....	90.00% Total Ingredients.....100.00%
Net Wt. 11.04 lbs. per Gallon Bulk	

*Caution: Do not apply with fertilizers containing phosphate or potash. Not compatible with any glyphosate formula, 2,4-D amine or ester herbicides. Always jar test before tank mixing. Keep out of the reach of children.*
