

# King Calcium Product Information Sheet

## Description and Uses

King Calcium is a 10% calcium liquid solution that is used to stabilize nitrogen applications and increase overall plant nutrient uptake. It can be mixed with liquid nitrogen and applied, or it can be broadcast ahead of all types of nitrogen fertilizer applications.

The calcium in this product is 100% available. Inexpensive sources of calcium, such as limestone, contain very small amounts of available calcium. If the soil is deficient in calcium or the calcium is not available, vital nutrients cannot reach the plant and plant health suffers.

## Benefits and Features

- Stabilizes and Holds Nitrogen
- 100% Readily Available Calcium
- Improved Nutrient Uptake
- Improved Soil Structure
- Increased Drought Tolerance
- Balanced pH
